## **COMMERCIAL EQUIPMENT LIST CAPABILITIES**

### **Pre-Press / Proofing Capability**

- Our Pre-Press department is anchored by 5 Mac workstations and 1 PC workstations. Both platforms are fully equipped with the latest versions of Quark, Illustrator, Photoshop, In Design and much more.
- We operate in a totally digital environment utilizing Direct -to Plate technology along with the Sherpaproof for color contract proofing and the Sherpa-matic for digital dylux.
- Our Apogee X, PDF Workflow processes pages and files in record time, insuring quick turn around on your project.
- We employ a hybrid screening technology called Sublima. It blends the advantages from conventional dot screening with the benefits of Stochastic screening into a solution that brings better proof to press matchability and a cleaner more vibrant look to every sheet.
- We proudly print 210 line screen on every job, making images look smoother and more defined.

### **Press Capability**

#### **• Komori LS 40P Perfector-UV**

Prints 8 colors + coating or 4 colors + coat over 4 colors in a single pass. Equipped with chameleon rollers to utilize commercial inks or UV inks. It also comes equipped with interdeck UV curing.

#### **• Komori 640 Lithrone RP w/UV upgrade**

The RP stands for reverse printer and that means that the press will print up to 6 colors and coating on one side and 1 color on the back side in a single pass. This press has recently been upgraded with interdeck UV curing and coating.

#### **• Komori**

High quality 6 color press with inline Aqua Coating.

#### **• 6 Color Man Rolland 700**

This machine adds valuable capacity by printing 6 colors and coating on a full size sheet.

## **COMMERCIAL EQUIPMENT LIST CAPABILITIES**

### **Kawahara off-line blank separator**

This machine takes die-cut sheets and removes the excess waste in a fraction of the time it takes when using conventional methods. This addition makes us the only choice when it comes to larger projects that involve diecutting. We've already completed projects where this machine drove labor out by more than 50% and increased productivity by 500%!

### **Brousse In-Line blanking machine**

This machine stands out with larger diecut projects where the piece size is small (credit card or gift card carrier size) because it actually attaches to the diecutter and strips the waste away from the sheet all in a single process so there is no need to schedule diecutting time then schedule blanking time separately. With this remarkable machine it becomes one seamless process and your project goes from the diecutter to the dock much faster!

### **Kongsberg High Speed Sample Making Table**

This machine enables us to quickly and accurately prototype your project before it ever goes into production. It replicates every crease and every score with fine precision.

### **Artios CAD**

This innovative software assists our packaging team in the creation and production of drawings and tools that help bring your project to market.

### **Finishing Capability**

We offer un-paralleled finishing solutions enabling us to serve Commercial, POP, Folding Carton and Specialty Packaging markets.

- 1 - 54' cutter (fully automated makeready and stacking)
- 1 - 45' cutter
- 3 - full size continuous feed folders (fully automated makeready)
- 1- Pocket folder/gluer
- 1 - Greeting card folder with cut score
- 1 - 6 pocket saddle stitcher with cover feeder
- 1 - 3 hole drill
- 1 - 5 hole drill
- 2 - Shrink wrappers
- 11 - Straight-line folder/gluers with hot glue and Peel & Seal
- 1 - Straight -line folder/gluer with Auto-bottom and 4/6 corner carton capability
- 1 - 44 inch off-line blanking machine
- 1 - 40 inch diecutter
- 1 - 3 station scanning camera

### **Fulfillment Capabilities**

We have a fully functional kitting and assembly department to handle projects that require special collating and insertion.

### **Shipping**

In-Plant Fed-x and UPS terminals along with several local delivery vehicles.
